

Add Dummy Products to Your Store

In preparation for contacting potential drop ship suppliers, you are going to add some 'dummy' products to your store.

I recommend 20-30 across at least 3-4 collections

A product can be added to multiple collections. For example, on the demo store I have a plush elephant in the Wild Petz collection and also in the Best Selling collection.

Go to 'Products' – 'Add a Product'

Copy and paste the title and brief description points that you grabbed earlier from Aliexpress. Make sure the title makes sense and edit it if not.

Upload the product image (one will do!).

Give it a price. To decide a price, just take a ball park figure by multiplying the Aliexpress selling price by 3.

Under 'Organization', create a 'type'. For example 'soft toys' or 'wallets' or 'socks'.

Choose a Collection from the drop down menu (this will list the collections that you created earlier).

Click 'Save'.

Repeat the process with all of the products you grabbed from Aliexpress!
